# ZYRIANOV SAVVA

## DIGITAL SYSTEMS & AUTOMATION SPECIALIST

**Open to remote work worldwide**

## Profile

Operations manager moving into digital systems: 5+ years leading People, Production and Service at a «Vkusno — i tochka» restaurant (Deputy Director for General Affairs, staff of 80). Automated bonus calculation and staffing, cut 90-day turnover by 28%, delivered 5–10% revenue plan overperformance with about 10% fewer staff hours, passed every audit first time; monthly guest CSAT 89%+. Hands-on with Bitrix24, Diadoc, HR Oracle, 1C; first-line technical support, including POS systems (chat, phone, e-mail). Experience with AI tools (Claude Code, Cursor, LLM assistants), local generative AI and LLMs, and basic prompt engineering; work with Linux servers (Docker, nginx, WireGuard) and panel-based setups; basic SQL (PostgreSQL, SQLite). Seeking a remote role in digital systems, automation, data and AI.

## Work experience

### Kontur
June 2025 — Oct. 2025

*First-Line Technical Support Specialist · chat, phone, e-mail · 5 months*

- Supported users in working with POS systems
- Advised users and handled requests across three channels: chat, phone, e-mail
- Diagnosed and resolved technical issues at first line (troubleshooting)

### Vkusno — i tochka (restaurant chain)
July 2019 — Feb. 2025

*Deputy Director for General Affairs · Moscow · 5 years 8 months*

- Automated bonus calculation and per-employee data upload from QSRAnalyze in Excel (Power Query), in line with the Labour Code of the RF and individual allowances (previously manual)
- Automated shift staffing-demand calculation and position allocation; scheduling for a team of 80
- Weekly planning of order count and average check with 87% accuracy
- Delivered 5–10% revenue plan overperformance while cutting staff hours by about 10% through optimised role responsibilities
- Reduced 90-day turnover by 28% (2024) and overall turnover by 17% vs. 2023
- Proposed improvements to the new-employee training system — accepted at the central level
- HR onboarding in HR Oracle, supplier invoices in Diadoc, contracts and invoices in 1C
- Passed all audits and inspections (food safety, Rospotrebnadzor, fire safety, cash room, HR, chemicals) first time with 85%+
- Monthly guest CSAT 89% or higher

## Projects

- Home lab: Linux home server and NAS (Samba); cascade of several servers under VPN (3x-ui, WireGuard, VLESS, iptables, nginx)
- Local AI: local LLMs (Ollama, Pinokio, Local API); work with Claude Code and Cursor
- CV website on GitHub Pages (basic HTML): crisp1n.github.io/savva-cv
