ZYRIANOV SAVVA

TECHNICAL SUPPORT · LINUX · AUTOMATION

Open to remote work worldwide

Profile

Technical Support Specialist with first-line (Tier 1) experience at Kontur and **5+ years as Deputy Director** of a Vkusno — i tochka restaurant (formerly McDonald's; team of 80). Combine user-facing support with a solid technical base: Linux, servers, networking and automation.

- **Support:** Tier 1 and **Service Desk** (chat, phone, email), resolving routine and complex issues, POS systems; PC diagnostics down to component level, remote assistance
- **Linux & servers:** deploy and maintain **Linux servers** (Ubuntu): Docker, nginx, SSH; home server and NAS
- **Networking & VPN: cascaded VPN servers** (WireGuard, VLESS, 3x-ui), iptables and ports, domains and DNS, basic connectivity troubleshooting
- **AI & automation:** build **my own applications** and automate routine work **with AI tools** (Claude Code, Cursor), run local LLMs; SQL, Python, APIs
- **Results: customer CSAT 89%+**, passed every audit in the last year on the first attempt, new-hire training improvements adopted by headquarters

Work experience

▪ Kontur (B2B SaaS)

June 2025 — Nov. 2025

Tier 1 Technical Support Specialist · chat, phone, email · 6 months

- Advised users on **POS systems** via chat, phone and email
- Diagnosed and resolved technical issues at Tier 1 (**troubleshooting**)
- Handled tickets in a **Service Desk** from logging to resolution
- Used the **knowledge base** (FAQ) to find solutions and explained them to users in plain language

▪ Vkusno — i tochka (formerly McDonald's)

July 2019 — Feb. 2025

Deputy Director for General Affairs · Moscow · 5 years 8 months

- **Automated** bonus calculation and per-employee data upload from QSRAnalyze in Excel (Power Query), in line with the Labour Code of the RF and individual allowances (previously manual)
- **Automated** shift staffing-demand calculation and position allocation; scheduling for a team of 80
- HR onboarding in HR Oracle, supplier invoices in Diadoc, contracts and invoices in 1C
- Reduced 90-day turnover by **28%** (2024) and overall turnover by 17% vs. 2023
- Exceeded the revenue plan by **5–10%** while cutting staff hours by about 10%

Projects

- **PC Remote:** control a home PC from a phone. **Android app** (Kotlin, Jetpack Compose) and **Windows agent** (C#, .NET 8); smart assistant on a local LLM, own animated design (ComfyUI)
- **Local AI:** local LLMs (Ollama, Pinokio, Local API); **Claude Code and Hermes Agent** on local models, work in Cursor
- **Home lab:** Linux home server and NAS (Samba); cascade of several servers under VPN (3x-ui, WireGuard, VLESS, iptables, nginx)
- CV website on GitHub Pages (basic HTML): crisp1n.github.io/savva-cv
