ZYRIANOV SAVVA

TECHNICAL SUPPORT SPECIALIST

Open to remote work worldwide

Profile

Operations manager transitioning into digital systems: 5+ years as Deputy Director of a Vkusno — i tochka restaurant (formerly McDonald's; **team of 80**). Automated bonus calculation and staff scheduling, reduced staff turnover by **28%**, exceeded the revenue plan by **5–10%**, and passed every audit in the last year on the first attempt.

6 months in first-line technical support at Kontur: assisted users with **POS systems** via chat, phone and email, troubleshot and resolved technical issues, and handled tickets in a **Service Desk**. Install, configure and recover **Windows**, provide remote support (AnyDesk, TeamViewer, Radmin), build and diagnose PCs. Hands-on experience with Diadoc, HR Oracle, 1C and Bitrix24.

Use **AI tools** (Claude Code, Cursor, LLM assistants), run local LLMs, apply prompt engineering basics; set up **Linux servers** (Docker, nginx, WireGuard), including via control panels; **basic SQL** (PostgreSQL, SQLite), Python and APIs.

Goal: a remote role in digital systems, automation, data and AI.

Work experience

▪ Kontur

June 2025 — Nov. 2025

First-Line Technical Support Specialist · chat, phone, e-mail · 6 months

- Supported users in working with POS systems
- Advised users and handled requests across three channels: chat, phone, e-mail
- Diagnosed and resolved technical issues at first line (troubleshooting)

▪ Vkusno — i tochka (restaurant chain)

July 2019 — Feb. 2025

Deputy Director for General Affairs · Moscow · 5 years 8 months

- HR onboarding in HR Oracle, supplier invoices in Diadoc, contracts and invoices in 1C
- Automated bonus calculation and per-employee data upload from QSRAnalyze in Excel (Power Query), in line with the Labour Code of the RF and individual allowances (previously manual)
- Automated shift staffing-demand calculation and position allocation; scheduling for a team of 80
- Reduced 90-day turnover by 28% (2024) and overall turnover by 17% vs. 2023
- Monthly guest CSAT 89% or higher
- Delivered 5–10% revenue plan overperformance while cutting staff hours by about 10% through optimised role responsibilities

Projects

- Home lab: Linux home server and NAS (Samba); cascade of several servers under VPN (3x-ui, WireGuard, VLESS, iptables, nginx)
- Local AI: local LLMs (Ollama, Pinokio, Local API); work with Claude Code and Cursor
- CV website on GitHub Pages (basic HTML): crisp1n.github.io/savva-cv
